£(3.99 - 4.99).Patent Documents 1 and 2
disclose a heat storage material having a
structure containing a lamellar metal sulfide in
which at least one layer of a metal sulfide is
laminated. Patent Documents 1 and 2 disclose

a heat storage material containing an inorganic compound in which a lamellar metal sulfide is dispersed in an inorganic compound, and a method of manufacturing a heat storage material. According to these Patent Documents 1 and 2, by forming a lamellar metal sulfide containing copper, nickel, aluminum or the like as a main component, and by laminating this, a heat storage material in which a lamellar metal sulfide is dispersed in a metal inorganic compound can be obtained. In Patent Documents 1 and 2, Patent Publications do not disclose a specific resin and plasticizer, but there are disclosed a method of manufacturing a heat storage material containing a lamellar metal sulfide and a method of molding a heat storage material. Patent Document 1: U.S. Pat. No. 8,101,462 (B2) Patent Document 2: PCT International Publication No. 2013/011957The present invention relates to a method of detecting a leak in a heat sink for liquid crystal devices and a leak detector for use in the method. Liquid crystal devices are devices provided with a liquid crystal panel and a heat

sink. The liquid crystal panel
