Thank you, GabyThe US and France have both been at the forefront of the European strategy of containment and regional isolation during the Syria crisis, with the US military sending anti-ship missiles against warships near Tartus, while French warplanes have dropped bombs on the outskirts of Damascus. One of the most interesting developments has been the sudden intensification of cooperation by Iran and Russia to defend Syria's critical oil pipelines, although both countries also have the responsibility for military action against Damascus.. At first glance, it makes sense that both countries would support each other's military action, since the US has been one of the most visible voices of opposition to the brutal regime and so far the West has done nothing in response.. I want to support this movie for as long as I possibly can. If you feel that the movie has inspired you to be a better person, a better filmmaker, feel free to share it with anyone, regardless of their age or interest in filmmaking. However, if you think that something in this movie has gone too far, I urge you simply to leave a positive review, and you may share your thoughts on the movie or on the entire genre of cinema.. EWorldwide S.B.E. – StarBuster (I) – \$34.99 The film follows an asteroid whose impact has created an explosion that threatens to devastate Earth. Set in 1970s Berlin, the film centers around the struggles of the crew of the starship Enterprise as they find themselves stranded on the hostile surface of a hostile asteroid. In addition to the traditional star-studded cast, the film shares the classic visuals of IMAX (from which most of the IMAX films were originally adapted) with CGI effects. A visual upgrade from the previous IMAX release, StarBuster will offer even better viewing for fans of the original movies.. It may be too late to stop the Assad government's aggression against the people, but one thing all sides can agree on, is that the war has cost too much in blood and suffering, with more than 250,000 killed.. Cineast – Cineast – UHD – \$34.99 It's not the first time filmmakers have tried to use digital 4K cameras to create more visually powerful films. This one uses the same film medium, which is why the 2D print is still somewhat impressive in the field, at least until your eyes start to bludgeon you with some of the images. Also, it features gorgeous new visuals, and the IMAX format has certainly come a long way since the days of the Laserdisc and the Cinerama.. It is possible, however, that the situation will only become more difficult if the Assad regime uses chemical weapons on its own people with no coordination, thus ensuring a war crime trial. This has already happened twice in the past few months, when chemical weapons were used, killing hundreds and the country's own witnesses claiming they experienced first-hand the effects. The use of such weapons by the Syrian government, regardless of who it is or which faction it represents, is abhorrent and has to be opposed to. If this were to happen again, President Assad would no doubt use chemical weapons on the people of one of its cities at gunpoint.. Stargazer HD – STARWARS HD – UHD – \$34.99 The first of our new IMAX features is still set around the events in the prequel trilogy of the Star Wars franchise, and this time, it will be available in 4K with 1080p in HDR. We've seen both the original "The Empire Strikes Back" and "Return of the Jedi" in IMAX, and this version will be very similar in a number of ways between the two films. And it makes the films more accessible in both 2.35:1 and 4K UHD..
