Q: How do I use import.io to extract image URLs, like URL.com? I want to use import.io to extract the following screenshot: I can not simply use TextBlock.Image in my XAML. Is there any way I can do this?

A: You should be able to get the image using: and then can display them like this:

Q: json structure with multiple levels of arrays

I want to create a json structure with multiple levels of arrays. I have this as my input

```
{ "id": "abc", "name": "xyz", "address": { "id": "abc", "town": "ny", "zip": "nyc" }, "phone": { "id": "abc", "number": "98769987654", "extension": "98769987654" }, "favs": [ b7e8fdf5c8
```

SASSCO POS for Hospitality is a reliable application that acts as a point of sale solution for restaurants, bars, pizza or cafe places. The software is user-friendly and allows you to create a detailed database in which to enter all the menus, dishes, drinks and other products you serve in your restaurant. You may place orders, generate invoices, take payments and print bills.

Simple to use POS system
SASSCO POS for Hospitality
allows you to manage the
customer service aspect of
your business, in a very easy
way. The application is easy
to use, features a complete
database and allows you to
accurately calculate each
meal. The software is
suitable for restaurants,
pizza places or bars, since it
features dedicated tabs of
products. You may check all
the tables and view the floor
map from each screen of the

program. Simply configure the tables, the number of customers and the order for each one of them. The software can calculate the prices based on ingredients or use the standard prices for drinks and other non-configurable products. Print bills and take payments With SASSCO POS for Hospitality, you may easily calculate the due payment and mark each order as paid. The software supports receiving payments by cash, by credit card, gift

certificate or voucher. Moreover, it can calculate the prices based on which type of food/drink you have ordered: entree, main or dessert. It can even keep a log of takeaway orders. From the payment menu, you may select either bill printing or payment making, for each individual table. Any action you wish to make can only be done if you are logged in as a manager or as an employee. You can use the first screen to log in by

swiping your card or entering the password, clock in and clock out. Reliable point of sale software SASSCO POS for Hospitality comes bundled with functions and options for order customization and calculating prices. You may setup the table configuration, number of customers, type of payment and even print out bills. Moreover, its modern looking interface and accessibility makes it easy for you to

place orders, take delayed payments or make reservations. Software Pricing Engine is an ai based software that automates the pricing of a software. Using OCR we extract the text from the software's page on your website into the in-built text processing engine of the software. The software generates the calculated price based on the image that is fed in. This automation technology can save time and effort,

SASSCO POS for Hospitality is a reliable application that acts as a point of sale solution for restaurants, bars, pizza or cafe places. The software is user-friendly and allows you to create a detailed database in which to enter all the menus, dishes, drinks and other products you serve in your restaurant. You may place orders, generate invoices, take payments and print bills. P2P

Sync is a great tool for boosting your P2P network by syncing your content with your friends. The sync software helps with ensuring that every peer is receiving the same content on their computer desktop so as to avoid duplication. You can also sync your content by network instead of just through internet. P2P Sync allows you to sync only the desired content. It will not include the same files and folders that are already in

your computer's system. This will prevent duplications in the files. The P2P Sync was developed by Yochano Ltd. and it is compatible with Windows XP/Vista/7/8/10. The P2P Sync can be used as a home and professional solution that is capable of synchronizing large number of users. P2P Sync has a highly intuitive interface that will make synchronization easy for you to perform. P2P Sync will allow you to sync the files by network but not

the local files. P2P Sync will also allow you to filter the content by file type. You can create a new profile for the P2P Sync, this will help you with saving your settings to the machine whenever needed. Last Modified: August 4th, 2018 Software Features Version: 2.0.2 File Size: 8.29 MB Last Modified: August 4th, 2018 System Requirements Operating System: Windows XP/Vista/7/8/10 System Requirements Operating
